Professional Summary

Senior Full Stack Developer with 7+ years of experience building scalable web applications using Angular, TypeScript, Java, and Spring Boot. Strong background in healthcare platforms, AWS cloud services, and event-driven architectures, with proven ownership of end-to-end features across frontend, backend, and cloud infrastructure.

Core Technical Skills

Frontend: Angular 18, TypeScript, JavaScript, HTML5, CSS3, SCSS

Backend & APIs: Java 21, Spring Boot, Spring MVC, REST APIs, GraphQL

UI: Angular Material, PrimeNG, AG Grid, Bootstrap, Chart.js

Architecture: Microservices Architecture, Distributed Systems, Event-Driven Architecture, API Design, Full-Stack Development

AI-Assisted Development: Prompt Engineering, ChatGPT, Claude, GitHub Copilot, Codex,

Cloud & Messaging: AWS (SNS, SQS, S3, EC2, IAM), Apache Kafka, RabbitMQ

Databases: MySQL, SQL Server

Testing: Jasmine, Karma, JUnit

DevOps & Tools: Git, GitHub, Bitbucket, Docker, Kubernetes, Azure DevOps, JIRA

IDEs & OS: VS Code, IntelliJ IDEA | Windows, macOS, Linux

Work Experience

Software Technologist

Philips - Bangalore

Feb 2024 - Present

Projects: Technician Portal, Ambulatory Virtual Care

- Architected and implemented Java 21/Spring Boot microservices and REST APIs supporting cardiac monitoring, virtual care, ECG workflows, and healthcare data integration.
- Developed scalable Angular applications by converting Figma designs into responsive UI components for patients, technicians, and healthcare professionals.

- Integrated AWS End User Messaging with SNS, SQS, S3, and EC2, supporting reliable SMS communication workflows and reducing third-party dependency on Nexmo/Vonage.
- Built event-driven, fault-tolerant messaging workflows using Spring Boot, RabbitMQ/AWS messaging services, enabling asynchronous communication across distributed systems.
- Designed and maintained REST/GraphQL APIs for integration with Philips HealthSuite and external healthcare platforms.
- Improved application responsiveness by up to 5× through lazy loading, optimized data handling, reduced API payloads, and frontend performance improvements.
- Ensured code quality, security, and license compliance by enforcing SonarQube quality gates and Black Duck policies across Angular and Spring Boot codebases.
- Developed unit and integration tests using JUnit, Mockito, Testcontainers, Jasmine, and Karma to improve regression safety and maintainability.
- Collaborated with architects, product owners, QA engineers, and clinical stakeholders across solution design, development, testing, deployment, and production support.

Software Engineer

Carelon - Bangalore

Sep 2021 – Feb 2024

Projects: Licensing & Credentialing, Senior Broker Oversight

- Developed and maintained enterprise healthcare applications using Angular, RxJS, and Spring Boot.
- Implemented Spring Batch processes, improving operational efficiency and reducing manual workloads.
- Optimized file uploads using AWS S3 and EC2, improving performance by ~50%.
- Ensured application stability through structured unit testing with JUnit and Jasmine.

Associate Software Engineer

Virtusa - Hyderabad

May 2019 – Aug 2021

- Contributed to large-scale enterprise applications using Angular and Spring Boot.
- Played a key role in Flex-to-Angular migration for Citi Private Banking, modernizing legacy UI and improving maintainability.
- Built a strong foundation in full SDLC, enterprise UI development, and performance optimization.

Education

Bachelor of Engineering - Computer Science and Engineering

KSR College of Engineering, Tamil Nadu | **2015 - 2019**
